Forward Looking Statements

This presentation is not to be construed as a public offering of securities in any jurisdiction in Canada. Important information about Tinkerine Studios Ltd. (Company) including their investment objectives and strategies, and share offerings are contained in the respective prospectus or offering memorandum. Please read these documents carefully before investing. Certain information set forth in this presentation contains "forward-looking information", including "future oriented financial information" and "financial outlook", under applicable securities laws (collectively referred to herein as forward-looking statements). Except for statements of historical fact, information contained herein constitutes forward-looking statements and includes, but is not limited to, the (i) projected financial performance of the Company; (ii) completion of, and the use of proceeds from, the sale of the shares being offered hereunder; (iii) the expected development of the Company's business, projects and joint ventures; (iv) execution of the Company's vision and growth strategy, including with respect to future M&A activity and global growth; (v) sources and availability of third-party financing for the Company's projects; (vi) completion of the Company's projects that are currently underway, in development or otherwise under consideration; (vi) Company's current customer and other material agreements; and (vii) future liquidity, working capital, and capital requirements. Forward-looking statements are provided to allow potential investors the opportunity to understand management's beliefs and opinions in respect of the future so that they may use such beliefs and opinions as one factor in evaluating an investment.

These statements are not guarantees of future performance and undue reliance should not be placed on them. Such forward-looking statements necessarily involve known and unknown risks and uncertainties, which may cause actual performance and financial results in future periods to differ materially from any projections of future performance or result expressed or implied by such forward-looking statements.

Although forward-looking statements contained in this presentation are based upon what management of the Company believes are reasonable assumptions, there can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. The Company undertakes no obligation to update forward-looking statements if circumstances or management's estimates or opinions should change except as required by applicable securities laws. The reader is cautioned not to place undue reliance on forward-looking statements.

This presentation is strictly confidential and proprietary to Tinkerine Studios Ltd. ("TINK") and (save to the extent required by applicable law and/or regulation) must not be released to any third party without our express written consent that we may at our discretion grant, withhold or grant subject to conditions. TINK accepts no duty of care to any third party for this presentation. Accordingly regardless of the form of action, whether in contract, tort or otherwise, and to the extent permitted by applicable law, TINK accepts no liability of any kind to any third party and disclaims all responsibility for the consequences of any third party acting or refraining to act in reliance on this document

Today's Manufacturing (The Problem)

- Current talent lacks the process and knowledge to best optimize 3D Printing (3DP) adoption.
- 3DP hardware is often acquired without an understanding of its effective use, as a result it's under utilized.
- 3DP industry is vast and segmented with hardware and software making it hard to navigate and pick the correct solution for professionals and businesses.

Solution

The platform where users go to learn 3D printing technology, 3D printing skills, and design-centric methodologies to best evaluate 3DP's impact for their workflow/business.

SME

“

Something that everyone should learn is
To build or to create.

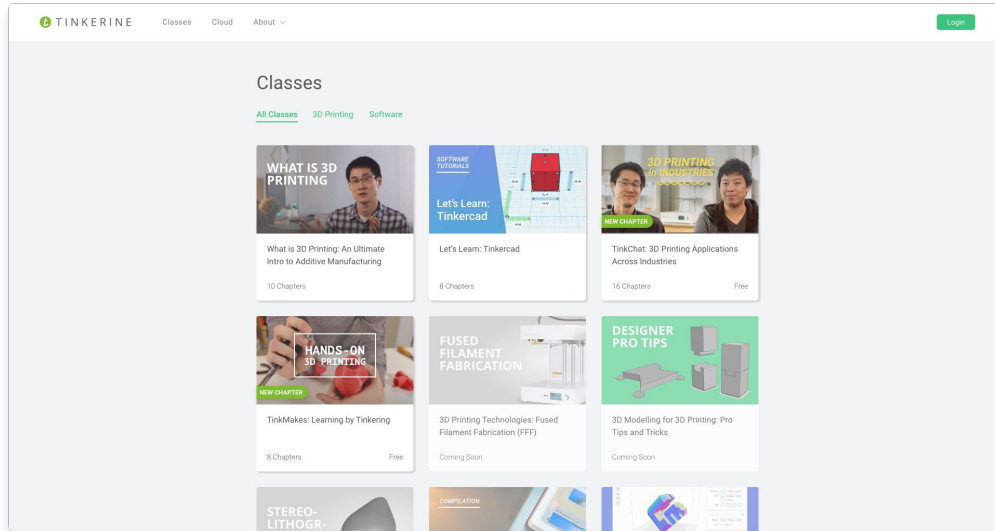

Jeff Unruh | K-12 Educator, **Pacific Heights Elementary**

“

Whenever we think of 3D printing, we think of
Tinkerine and their outstanding customer
services along with fast turnaround time.

Vinh Huynh | Project Coordinator EIT, **Bird Construction**

Our Products Skills

Explore an constant expanding library of 3D printing skills training content, at your own pace, built with experts and partners.

Content in the following areas:

- 3D printing technology verticals
- Design for Additive Manufacturing
- 3D modeling knowledge
- Industry applications
- Business adoption and training
