

Tinkerine introduces *TruSight* anti-fog coating for Face Shields

June 1, 2020 - Tinkerine™ Studios Ltd. (TSXV: TTD) ("Tinkerine" or the "Company") announces the launch of *TruSight*, an applied anti-fog coating for *Tinkerine Face Shield* and *Tinkerine Face Shield Lite*.

TruSight anti-fog coating for Tinkerine's face shield products addresses many of the critical roles and applications of Tinkerine's customers' protective face shields. This complementary product is in response to users in many market segments where their face shields are easily fogging up from condensation created by the moisture from their face masks. For many essential jobs, this problem is beyond a nuisance and it can be a dangerous liability and interfere with worker productivity.

Eugene Suyu, Chief Executive Officer commented: "Our rapid development of *TruSight* anti-fog coating was from the urgent need reported by essential workers. Our Applied Design and agile thinking process allowed us to quickly produce an effective solution to a very serious problem. We are aware that most clear visor materials found in North America do not come with anti-fog capabilities. We expect *TruSight* to be a great companion product for our own face shields but also for many other face shields in the current market."

Immediately, Tinkerine will offer the anti-fog coating as an add-on when purchasing *Tinkerine Face Shield* or *Tinkerine Face Shield Lite*. Tinkerine is also planning to offer the product separately for users who bought other face shields to insure their protection.

The *TruSight* anti-fog coating option will be offered at an extra \$2.00 CAD per shield at Tinkerine's Online Store. Pricing for standalone *TruSight* is expected shortly.

About Tinkerine

Our mission is to provide a foundational understanding about Applied Design and demonstrated by 3D printing. Our ecosystem of 3D printing products and educational resources equips future generations with the innovative tools and products to stay ahead in a fast-paced, tech-driven world. Tinkerine enables the curious to convert creative ideas into the tangible and the unimaginable.
