

Tinkerine's DittoPro 3D Printer Awarded For Overall Performance By MAKE Magazine

Two Year Old Brand Delivers High Quality Customer Experience As It Competes Against The Industry's Biggest Players And Latest Upstarts To Bring 3D Printing To The Masses

Vancouver, BC – November 12, 2014 -- Tinkerine™ Studios Ltd. (TSXV: TTD and OTC Pink: TKSTF) Canada's leading manufacturer and distributor of 3D printers, is pleased to announce that its Ditto™Pro printer was recently featured in MAKE Magazine's Annual 2015 Ultimate Guide to 3D Printing. The magazine tested 26 of the top desktop 3D printers for overall performance, notable print quality, and price.

The review highlighted the DittoPro's overall high performance during the extensive testing; and placed it consistently near the top in terms of reliability, software integration, upgradeability, number of features, price, and print quality (dimensional accuracy, surface finish, overhang capabilities, and more).

The magazine editors were quoted in their evaluation: "The DittoPro is a great-looking machine with print performance to match. It scored as well as some of the best printers we tested, while far less expensive than most of them... we believe that the combination of good design and easy to use software would make it ideal for new users."

Tinkerine CEO, Eugene Suyu commented "We are honoured to win MAKE Magazine's praise for a second year in a row. We know that when one factors in design, ease of use and overall performance, with price and customer experience, that the DittoPro remains one of the best value printers in the market today and is the perfect choice for schools and general users. We've built our business on providing great value and believe this will drive significant consumer adoption."

About Tinkerine

Tinkerine develops, manufactures, distributes, and sells 3D printers, software and materials for the consumer and education markets, the fastest growing segments of 3D printing. Current products include the recently released Ditto Pro, the award-winning Ditto+ and Litto 3D printers, all acclaimed for their high performance and affordability. Tinkerine's 3D printers work seamlessly with its integrated 3D software to make printing intuitive and accessible to anyone. With a major focus on education, Tinkerine continues to position itself as one of the emerging leaders in the 3D printer market both in North America and abroad.

Tinkerine shares are listed on the TSXV, under the symbol TTD.V and TKSTF on the OTCPink.
