

## **Tinkerine Signs Canadian 3D Printer Dealer Voxel Factory, Enters Quebec and Eastern Seaboard Market**

### **Dealer To Carry Award Winning DittoPro 3D Printer**

Vancouver, BC – November 14, 2014 -- Tinkerine™ Studios Ltd. (TSXV: TTD and OTC Pink: TKSTF) Canada's leading manufacturer of desktop 3D printers and content, today announced that they have made an initial shipment of Ditto™Pro 3D printers to Montreal based [Voxel Factory](#). The 3D printers are in stock and available for purchase immediately.

Tinkerine is excited to support great dealers like Voxel Factory who recognize that the DittoPro is the best value 3D printer that exists today in the prosumer and education markets. Our recent [Make Magazine Award](#), which put us up against 25 other 3D printers in the space demonstrated why the DittoPro continues to be recognized for its top-all-around performance, a perfect choice for schools and general users who need a reliable and affordable printer that can meet a broad range of 3D printing needs.

Voxel Factory's owner François Lahey commented, "We are impressed by the accuracy and ease of use of the DittoPro. During our testing phase, we found everything from bed leveling to firmware upgrade to be much easier than many other 3D printers we already used. Businesses don't want to spend hours on calibration, settings, and debugging, they just need things to get done fast and easily to stay ahead of competition. The Tinkerine DittoPro is the right 3D printer for any internal R&D and prototyping department, as well as schools, libraries, artists, architects, and families. Stop working on printers, start making things!"

Tinkerine's channel manager Ben Yan further commented, "Francois and his team did extensive testing before they signed up to be our dealer. We welcome Voxel Factory on board and look forward to expanding our customer base in Quebec and the Eastern Seaboard."

### **About Voxel Factory**

Located in the heart of Montreal and very active on the web, Voxel Factory helps clients from

the province of Quebec and the rest of Canada choose the 3D printer which best suits their specific needs. At Voxel Factory, Makers, Artists and Engineers will find the supplies they need for all their projects. Our advisory services, after-sales support, in English and French and the repair of 3D printers, is key to our success. We pride ourselves on customer satisfaction and have an extensive and loyal customer base.
