

Tinkerine Launches Ht Filament and Limited Series Filament Initiative

Vancouver, B.C. – September 15, 2016 -- Tinkerine Studios Ltd. (“Tinkerine” or the “Company”) (TSXV: TTD, FSE: WKN WB6B and OTC: TKSTF) is pleased to announce the launch of two (2) new additions to Tinkerine’s filament line. The two products, Ht Filament and Limited Series Filament Initiative will bring more choices to customers and greatly complements the Company’s existing product line.

Ht Filament is our specially formulated high temperature resistant filament that can handle up to 90 degrees Celsius in air. “With Ht, we change the way we look at the need for ABS while maintaining the ease of use, safety, reliability of PLA, and the strength of what we want from ABS.” says Eugene Suyu, President and CEO of Tinkerine.

Limited Series Filament Initiative takes a new approach on how we get to understand what our customers are looking for. The color choices are not selected by Tinkerine, but instead driven by those that are leading the industry forward and produced in a limited production run.

With the introduction of the two new additions of our filament line of products, we look to change the way the industry looks at filament. “The depth of how we get to understand our customers will ultimately be how we bring value to the shareholders as well as our customers,” added Suyu.

The filament can now be purchased on the Tinkerine Website at www.tinkerine.com.
